610527 - Skywalk Submissions - Support

From: webforms@narrandera.nsw.gov.au on behalf of [Emma Piltz](#)
To: [Council Web Enquiries](#)
Subject: Skywalk
Date: Wednesday, 30 March 2022 1:08:34 PM

One of my most favorite things about Narrandera is its natural beauty and wilderness. Walking on country, sipping in the peace and tranquility along any of our waterways, wildflowers, animals and insects dotting the paths. At first the thought of a huge engineered man made structure in the middle of Mother natures beauty made me cringe. But as I have sat with it and thought about the lovely places I have visited over the years I believe it could be a positive addition to our community. As it is a draft design maybe its the concept that needs some work. Decisions like this should not be made lightly but they should also not be emotionally rejected. The skywalk also needs to be thought of as a hole story, what is the future use for this land looking like. Where will people park, how will they access the area. How will they skywalk age, will it age with beauty and soften into the lanscape or will it degrade and be an ansore and a money sicnk for years to come. I have attached an image of Kalbarri Skywalk in WA. Personally this is my favorite of many Skywalks that take front and centre in a number of ancient landscapes throughout Australia.

Subject: SKY WALK SUPPORT

Hi Shane, just a quick email to throw our support behind the proposed Sky Walk. I think the community would have benefited from some better vision of what the finished product might look like. The engineers drawing didn't quite cut it I think.

Also ,I attended the free movie night with the grandchildren last night, and they thoroughly enjoyed it. I happened to notice an "Eagles Nest" sign on the new club rooms. Interesting, I thought it was a community club rooms, not an AFL club rooms ?

Have a great day,

Kind regards,
Denise and Derek Makeham

Subject: Skywalk Proposal

The General Manager
Mr G Cowan
Narrandera Shire Council
East st
Narrandera 2700.

Dear Mr Cowan.

Re: The Skywalk.

I'm writing to voice my thoughts on the skywalk and I think it's a great idea.
It is very sad that the rail bridge project could not go ahead so I think the next best thing is this skywalk, it would be great for the town to have this and I believe it will only add to the amenities up at our beautiful lake.

Yours Sincerely
Kae Smith
90 Twynam Street.

George Cowan
General Manager
Narrandera Shire Council
31st March 2022

SKYWALK PROJECT SUPPORT

Dear George,

I am writing to you to in support of the Skywalk over Lake Talbot project proposed for Narrandera Shire Council.

Not much has changed since the decision was made at The Ordinary Meeting of Narrandera Shire Council in October 2021 and as the mover of the resolution, I stand by my comments on the day.

There are still land claim issues, residents near the proposed development would lose their privacy and right to a peaceful lifestyle, who has tenure over the bridge, the grant timelines, and no public access to the bridge are all solid reasons for not going ahead with the lattice bridge project. Only 50 people out of a population of over 4000 are speaking out, hardly the majority.

The notion to return the funds is ludicrous and in my belief would jepordise future funding opportunities for Narrandera Shire Council.

The skywalk project fits the grant guidelines and would be a welcome addition/attraction to the Shire.

Yours Sincerely

David Fahey, OAM
Narrandera Shire ratepayer

90 Cypress Road
Narrandera NSW 2700

15 April 2022

George Cowan
General Manager
Narrandera Shire Council
141 East Street
Narrandera NSW 2700

Dear George

I would like to register my support for the proposed Lake Talbot Skywalk project.

I believe that an additional structure adjacent to the Lake Talbot Pool Complex (complete with slides and associated structures), Lake Talbot Tourist Park, boat ramp, amenity block, etc fits logically into a developed area around a man-made lake. The construction location fits into an already disturbed area with an abundance of man-made attractions and can only improve the proposed construction site.

I believe the opposition by some community members to the Skywalk project on environmental grounds is seriously flawed, particularly if they are also still asserting that the rail bridge was a better project for environmental reasons.

- The lake is man-made, the surrounds are already extensively developed, there are already many visitors and vehicles to the area, and additional visitor numbers will make little difference to the environment.
- Conversely, the rail bridge sits quietly away from significant vehicle and foot traffic in a natural environment which is a favourable circumstance for the native flora and fauna. Had that project gone ahead, there would have been considerable changes including constructed ramp and parking, plus the disturbance to a natural and peaceful area by the addition of people, their vehicles, noise, litter, etc.

I believe the opposition by some community members to the Skywalk project on aesthetics is seriously flawed.

- The concept drawing of the proposed Skywalk has been identified as 'concept'. There has been no announcement of which I am aware stating that it is the design of the final structure. I would expect that, if approved, the design would be developed to be sympathetic and complementary to the environment and surrounds.
- I have visited skywalks/viewing platforms throughout Australia, New Zealand and Europe. The one characteristic linking them all is that the design is immaterial, the focus is the view. Many are unobtrusive and frankly unremarkable because it is not about the structure, they have been designed to showcase the view.
- What is pleasant to the eye for one person may not be to everyone's liking, however feedback on aesthetics should wait until a detailed design is available. There was considerable opposition regarding the design of the Sydney Opera House and the London Eye prior to final approval; both are now acknowledged as icons of their respective cities and are significant tourist attractions. As Taylor Swift sang, "haters gonna hate" and there does seem to be a minority who are intent on opposing the project in any form.

- There seems to be small group that has not appreciated the difficulties achieving the proposed rail bridge project (eg: ownership, access, lack of or onerous approvals from State Heritage and TfNSW, lack of agreement from other key stakeholders, etc). The rail bridge is beautiful in its simplicity, however the potential addition of ugly security fencing, mid-way barrier, signage, and metres and metres of concrete ramp, etc would render it very ugly in my opinion.

I attended a public meeting on 29 March, its purpose promoted on facebook as being to save the lake from the Skywalk. It has been disingenuous for organisers to say the meeting was unanimously against the Skywalk.

- The meeting was promoted clearly to people who did not want the Skywalk and many supporters of the project did not feel there would be any point attending.
- Although there was an informal call during the meeting for people to vote against the Skywalk proposal, there was no corresponding opportunity for those of us in favour of the project to respond.
- The meeting attracted approximately 50-60 people. I felt that there were possibly four-five people younger than me, with probably 85% of those in attendance aged 60-90. Those attending the meeting may have been predominantly against the Skywalk project, but it was a very narrow cross-section and not representative of the broader community.
- In the past week there have been two posts on a Narrandera community facebook page, including a poll, which garnered much community feedback. Before mysteriously disappearing, the poll was returning approximately 136 in favour of the Skywalk to 90 against. Posts included feedback from a diverse sample of the community with a wide spread of ages and interests.

Some community members have suggested the funding be returned to the government. This is seriously flawed.

- The funding is tourism related. Any increase in visitor numbers and preferably overnight stays has the potential to increase expenditure in Narrandera, benefiting both business owners, their employees, and the wider community as a result.
- Returning funding has the potential to flag to governments, and the bureaucrats making allocation decisions, that Narrandera Shire does not want or need injections of grant money. A great many projects in councils across NSW are dependent on grant funding via a competitive process. I cannot see any benefit in making it harder to achieve this vital form of resourcing.

Some community members against the Skywalk project have indicated that my opinion does not count as I work for Council. This is seriously flawed given my connection to Narrandera Shire is much more than my current employment.

- My great-grandfather came to Brewarrena Station with Jeremiah Rogers in 1861 and over the next 160 years my family has continued to farm at Sandigo.
- I have lived in Narrandera Shire my entire life; at Sandigo, Grong Grong, and at various Narrandera addresses as a ratepayer. I have chosen to remain in Narrandera to raise my family in the home we built here.
- Eighty percent of my life has been spent not working at Council. My work history has been with three major employers based in Narrandera Shire.
- My role at Council has had no input or involvement with the skywalk project to date.

Yours faithfully

Helen Ryan

Skywalk

Message

This is a positive tourism idea and one I believe will benefit and promote Narrandera encouraging people to stay in our town, spend money in our town.

Local business houses will benefit from people spending money in the business's providing increased employment opportunities to local people and community groups.

This can only be a positive step for Narrandera.

Narrandera skywalk design opinion.

Message

I personally think the skywalk would be an awesome idea.
Something I'd myself love to walk out and observe the view on weekly even daily! Although, as long as it doesn't effect/destroy anything we've already got in the area it's wanting to be built.

To whom it may concern,

I am writing to put forward my support for the skywalk project. I believe this addition to the lake will not only make observing recreational activities more accessible but increase visitation to our region.

Kind regards,

Matthew Kraeh

Lake Talbot Skywalk

Message

A few points:

13 metres is really not very long-if we are having it..can it be longer (bit more impressive), without causing a danger to boating?

The aerial view (ref 22164-D-0100-02rA) looks a bit like a Goanna- can you incorporate an indigenous/Wiradjuri designs/art work to emphasise this? Perhaps even in the safety fencing

Security/safety and access are a concern. I note the fencing however will this be enough to deter fools?

Is there consideration of immediate adequate parking for the visitors?

It is a shame that the proposed Bridge walk proposal did not proceed after all the work and vision that went into it.

Skywalk

Message

This will be great when my family come to visit.

I am wheelchair and home bound almost all of the time. This skywalk will mean that I can still enjoy family outings to look at all of our beautiful areas. I won't have to be left at home

Skywalk Submission

Message

To Narrandera Shire Council

As part of the Community Engagement Process for the Skywalk, I was initially in favour of the first nominated project of the walk way across the old rail bridge at Town Beach, this project gave good merit in continuing to creating a user link to areas like from the Rocky Water Holes, Lake Talbot, Brewery Flats, the Wet lands and onto Town Beach.

The Town Beach Rail Bridge Walk Way would have been a great user attraction allowing people to get up close to such a beautiful historical bridge allowing for a magnificent views of the river and bushland. Town Beach in its current form is unattractive, overgrown with weeds, and under used, this project would have brought forward a need to keep this area a lot more usable and promotable.

I understand the initial funds were then transferred to the alternate project of the Skywalk at Lake Talbot. I would like Council to revisit the River Bridge Project and make sure that it is 100 percent an unachievab firstly, I do see merit in the Skywalk as an alternate project as it would be a greater loss to lose the grant altogether with having having no project.

Regards

Troy Lee

Lake Talbot Skywalk

Message

The skywalk is a fantastic idea. I believe it will be very beneficial for not only tourists, but also the locals and the youth of Narrandera. It will tie the area in together and make it look complete. It takes advantage of the picturesque views of Lake Talbot, the Common and surrounding areas. Not only will the skywalk capture the beauty of what our wonderful town has to offer, it is also accessible for all people of different abilities. The youth of Narrandera will see the skywalk as a valuable addition to our town and for our future. Increased tourism from any improvement to Narrandera will bring more opportunities for jobs and growth.

Proposed Skywalk

Message

I think the proposed skywalk for Narrandera is a marvellous idea. It will be such an added asset to the Lake Talbot complex and as the only one in the area will definitely draw tourists to our town. The tourist dollar is very important to our town and I feel we should do what we can to attract people to our beautiful town.

Narrandera Skywalk

Message

I would like to congratulate Narrandera Council on the progressive initiative to install an inclusive skywalk in a beautiful but inaccessible area near Lake Talbot. As a visitor to the town, this would definitely inspire me to return. I think it is a very clever way to encourage further visitation, benefitting the local economy by longer stays and increased tourism dollar spend. It is also a very forward thinking idea to attract new residents. This idea ties in so well with the increased interest in nature based tourism and complements the planned pedestrian bridge across the canal to Brewery Flats. Well done on a brilliant idea!

610528 - Skywalk Submissions - Objections

From: Gary and Margaret Powell <lecogaz@gmail.com>
Sent: Thursday, 24 March 2022 7:10 PM
To: Council Emails.
Subject: Skywalk

I live in Nords Wharf on the shores of Lake Maquarie, but grew up in Narrandera leaving to attend college and for work. Growing up with beautiful Lake Talbot was a highlight. Family would come from the surrounding areas and enjoy the natural beauty of the area. I wonder why a massive steel structure needs to invade the beautiful natural environment. Is it a cost effective venture?

Hopefully the people will object to this and it won't be built.

Subject: The Skywalk

I wish to offer my dismay at this supposed new project. This is in place of the old Tressle Railway Bridge. The one that is displayed on the Real Estate wall as it is on the Chemists window. How is it that after all the investigation, pre planning and expense, that was involved in that project we now find it has been shelved. A decision that we the towns folk didn't have a say in. The grant was for the bridge. I feel that the side ways shift to try and use that grant for another 'idea' will not be looked on favourably. It may have an adverse affect next time the Council applies for yet another grant.

The new Water Park is amazing and people love it. The Lake was a beautiful area when I first came to town in 1973, with the Willows as a green backdrop to this area. Will this Skywalk be a visual deterrent with the many boating craft using the area. What about our well known water skiing events held here. I am sure they don't want this walk looming over the area.

So yes, you can see from these comments that I am definitely not in favour of the Skywalk being built.

Subject: Skywalk objection

Dear Councillors,

As a ratepayer and resident of Narrandera Shire I would like to note my objection to this monstrosity. I would and do support the idea of improving the stone stairs connecting Lake Talbot boat ramp and Lake Talbot Water Park carpark and the construction of a boardwalk and pontoon along the lake's edge west of the boat ramp. However I do not support the concept of a SkyWalk out over Lake Talbot. We need to do everything we can to enhance our natural environs, not build monstrosities that will destroy the views in the area.

Regards

Melanie Beer

I wish to lodge my objection to this proposal. It would be a blot on the landscape and I doubt it would bring the number of tourists to this town to justify the huge cost involved. Yes, the grey nomads who stop for morning tea at our beautiful Marie Bashir park may duck over to have a look but it's not going to encourage them to stay over night or to make it into the main shopping precinct. It is definitely the grey nomads who pass through our beautiful town. School holidays during the cooler months, yes, we get families as well. Not so much during the hot months. I have a couple of suggestions which could be built onto as we gain further grants.

1. Cycle paths to be extended along our section of the river. The cycle path at Tumbarumba is one example. When we stayed at caravan park not long after it first opened there were three different caravan clubs staying during that week. You couldn't move down the main street. All cafes full and parking was at a minimum. If we could turn the cycle paths into one where competitions could be held this would appeal to all ages. Admittedly there would need to be considerable earth works to make one of the tracks up to competition standard.

2. Walking tracks along the river could be expanded. Example being the river walk at Hay which includes benches with river views and barbques, There is access at various points for vehicles to park. Along the way there are information stations and some great metal artwork.

3. Street art. We have such a rich history, not just indigenous, which we don't appear to promote. Our chinese and agricultural history would make amazing scenes for street art. We have many buildings on corners just crying out for this type of art.

Suggestions 1 and 2 would definitely fit into the playground theme. They would also benefit the local community as well not just the tourist.

Suggestion 3 would possibly bring another type of tourist to town. They are once again primarily grey nomads who follow the silo art trails and looking around artwork being showcased through a town is definitely gaining in popularity as it spreads to more and more towns.

In closing I believe the Skywalk is selling our beautiful town short.

Kind regards
Kathy Taylor

To: Cowan, George <George.Cowan@Narrandera.nsw.gov.au>; Bryon, Barbara <barbara.bryon@bigpond.com>
Subject: Re: Skywalk

Hi Barb,

Thanks for your email. I was unsure of the skywalk when it was first proposed but after having visited the site, I think it will be a wonderful addition to the area.

As you know it is grant money and we have already applied for a change in the project and if we apply again to change the scope it won't be successful and if we don't complete a project with this grant money that is similar and of the same value as the original project, we will have to send that money back. This will certainly not do us any favours in future grant applications. A walking track along that area would be wonderful but again that has some teething issues, one being that the land is crown land and so far, we have not been successful to obtain permission to do works of any kind along the walking track and there is also sacred land along the way that will need to be preserved. Until these things are in order, we can't build a walking track. I walk along the current track often and although it is a bit rough in some areas it is still accessible and a beautiful walk especially in the early hours of the morning. It takes me around an hour and a half to walk that loop around the lake. I stop to take a lot of photos especially if the waterfall is running.

I know your disappointment in the bridge project and your feelings are valid, but that project was never going to fair well with the RTA not agreeing, the heritage people not agreeing and the fact that the area is very sacred to the Aboriginal people who were in fact against the project.

I would have loved to see a walkway over the bridge and back into town if it were in another location and not next door to Koori beach.

I am sure that the viewing platform will be well received by visitors and locals in the future. I have heard quite a lot of positive statements about it especially from the younger members of the community. My own son in law is an engineer and senior project manager of a world-wide company and when I showed him the plans, he was very impressed with the design and thought that it would sit well in the area.

Thanks again for the email Barb.

To: Lewis, Cr <cr.lewis@narrandera.nsw.gov.au>
Subject: Skywalk

Hello Tracey

I am writing to ask you to seriously consider the negative impact the Skywalk would have on our community.

It does exactly what the river bridge would have done, and the bridge would have been a much more satisfactory use of the money. However that is now past, so time to move on.

There must be another project that would fit in with the brief of the Playground on the Murrumbidgee, much more usable for the community and visitors.

My suggestion is a proper walking track along the lake from Rocky Waterholes to the pool to make a complete walking track loop. While this would not cost the full amount being utilised, it could be part of a bigger picture.

Other people will have other suggestions and I'm sure they will be considered appropriately.

Cheers

Barbara Bryon

To: Cowan, George <George.Cowan@Narrandera.nsw.gov.au>
Subject: Lake Talbot Skywalk

Good morning, George, hope you are well. Please see my submission below RE Lake Talbot Skywalk

I wish to put forward my submission about the proposed "Skywalk" to be built on the edge of Lake Talbot. While I understand that this project is funded by government grant money and is being built for the purpose of attracting and enticing tourists to our town I am strongly against this project for the following reasons.

1. I personally don't think that this project is a great 'Bang for Buck' project and from what I have seen and read it is merely just a viewing platform, surely if we want to get a great view of our beautiful lake that money could be better spent on existing viewing areas i.e., the lookout at the top of the boat ramp hill.
2. What access is there going to be to the "Skywalk" itself? Are there going to be steps down to it? Is everyone going to be able to access it based on the demographic of tourists that stay at the Lake Talbot Caravan Park (I feel that this demographic of tourists would be more likely to use it than anyone else).
3. As I have said previously, I do not think that this will bring more tourists into town rather give those tourists that have already made their way here for various other reasons something extra to look at, is this worth the \$820,000+ that has been allocated to this project? I personally don't think so.
4. As a local resident and business owner I would like to see those funds go into a more worthwhile project like re-establishing a better walking track between the lake and the rocky water holes that is accessible for everyone, I think this would be a better utilisation of the funds that have been given.

I was born and bred here and I have seen a lot of people come and go with some good ideas and some not so good ideas, unfortunately some of the not so good ideas we are now stuck with! As a community we must work collectively and cohesively to ensure that we do what is best for our town and our whole community and if an agreement cannot be reached maybe the Council should give the grant back to the government because at the end of the day us as taxpayers are funding that grant.

I hope you will take my thoughts into consideration before making a decision on whether to proceed with this proposal or not.

Regards

Matt Cottom

Subject: Skywalk

I do not agree that a Skywalk at Lake Talbot will in any way add to the experience of visiting Narrandera. I believe it would detract from the surroundings and would ultimately be an eyesore. Please listen to ratepayers this time and I believe money would be better spent developing and improving walking and cycling infrastructures around the town and surrounding bushlands.

Subject: submission re Skywalk

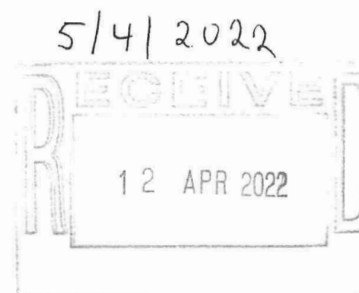

I was at the meeting last Tuesday when the audience was unanimously against the Skywalk.
Reasons: We are all ratepayers and can see the burden of cost of maintenance and INSURANCE - one death will wreck the whole Playground ... tourism project, (And don't say I am being fanciful, I taught the young fellow at Ndra High who was killed in his early twenties diving off the Darlington Point Bridge).

Young people are all in favour of the sky crane because they are :

- not rate payers
- think they are bullet proof
- don't notice how ugly the crane is in the natural setting of the lake.

Please do not spend the grant money on this ugly monstrosity. If we can't have something that adds to the town, like a lovely walking track to Rocky Waterholes let us give the money back.

Regarding Aboriginal objections, try negotiating with them. Make it their track with their names and signs etc. We should have an inclusive society.

To

Narrandera Shire Council General Manager George Cowan

Mayor Neville Kschenka and Narrandera Shire Councillors

Dear Sir/Madam

I am writing to you to express my concerns in regards to the planned skywalk at Lake Talbot. In my opinion the skywalk would have a negative impact on the natural beauty of this area.

I am a frequent visitor of the pool complex and the view from the pool across the lake and the common is beautiful. I often meet out of town visitors at the pool and they always express how impressed they are with the beautiful surroundings, there are virtually no other buildings to be seen (apart from the old pump shed) just nature.

With over 80% of Australia's population living in urban areas I believe that tourists coming to our regional areas are not interested in new manmade structures of which they have plenty in the city, but would rather be in a natural environment or visit places with historic significance.

My first preference would be to use the existing funding for the lattice railway bridge project as this is a historic monument that could be a real drawcard to the area and would work in well with the existing bike tracks in the wetlands and the Common.

It was very disappointing to hear at last week's public meeting that the Councillors (in caretaker mode!) took it upon themselves to reject the proposal, especially without involving or informing the local Landcare group who spent countless hours working on the proposal. It is thanks to the local Landcare group that we have the Wetlands and the Rocky Water Hole Bridge, their track record speaks for themselves and they certainly deserve to be informed and consulted.

If the grant money can't be transferred back to Railway Bridge project, I would suggest to use the money to improve the walking tracks around Lake Talbot and make them more accessible for tourists and locals. The walking track that starts near the boat ramp and goes all the way to the Rocky Water Hole has beautiful views over the lake. It is however very narrow and in parts unsafe. It is not signposted and therefore mainly only known to locals. An improvement to this track would enable visitors to do a Loop around the lake, coming back on the track along the channel (adjacent to Common).

That existing track along the channel could also be improved and be made wheelchair friendly to give even more people the chance to explore that area and spot some koalas on the way.

Thank you for your time

Kind Regards

Heidi Logemann

NARRANDERA 2700

Dear George

Subject: Proposed Skywalk for Lake Talbot

At the recent meeting of Narrandera Landcare Inc on 22nd March 2022 the proposed Skywalk to be located at Lake Talbot was discussed by members who expressed concern over the impact of the structure on the Lake Talbot Environs.

The meeting resolved to advise Council that Narrandera Landcare Inc does not support the reallocation of the funding from the Railway Lattice Bridge proposal to construct the Skywalk project at Lake Talbot.

This position reflected the following concerns

1. After examining the plan and location of the proposed Skywalk project members are of the view that it will have an adverse unappealing impact on the natural environs of the lake
2. It is considered that the structure will have significant safety concerns to users of the structure and persons using the lake facilities.
3. It is considered that sufficient natural views of Lake Talbot already exist from both the Lake Talbot Water Park and the Boat Ramp area.

The motion adopted at the meeting also asked that Council support the Lattice Bridge proposal as a current or future project should available funding and approvals be gained. It would be appreciated if Council can be advised of this position.

Yours Faithfully,

A handwritten signature in cursive script, appearing to read "Ken Murphy".

NARRANDERA 2700

Dear George

Subject: Submission supporting reinstatement of Lattice Bridge Project in lieu of proposed Skywalk Project

Narrandera Landcare Inc wish to respond to the call for public submissions associated with the proposed Skywalk project and also the recent public meeting associated with the proposal.

In summary Narrandera Landcare Inc ask that Council review its position in regard to the Skywalk proposal and reinstate the funding allocation to the Lattice Rail Bridge Project under the "Playground on the Murrumbidgee" Grant funding arrangement.

The following circumstances support this review;

- a. Much work has been undertaken to bring the Lattice Bridge Project to fruition. In the last six years detailed negotiation with key agencies have been in progress culminating in the preparation of an Integrated Development Application. Notwithstanding that Council did not approve the Railway Bridge Application, the template for a Development Approval process has been established.
- b. The project was originally approved and allocated funds under the "Playground on the Murrumbidgee" package and supported by Narrandera Shire Council.
- c. The recent public meeting to gauge the community support for the Skywalk reflected strong support for the Railway River Bridge project over the current Skywalk proposal.

Narrandera Landcare are confident that with the strong community support and a definite commitment of Council that the Railway Lattice Bridge can be successfully reinstated and achieved.

The outstanding agency issues are summarised below;

Heritage Council of NSW

Approval under Section 60 of the Heritage Act 1977 is required for the project to proceed. An application under this section had been made by John Holland Rail and involved the removal of rail line and sleepers from the bridge. The Application was refused on 24th March 2021. A number of variations were proposed that would identify the bridge as a railway bridge but did not appear acceptable to the Heritage officers involved.

A favourable response has already been received from Heritage NSW as General Terms of Approval Integrated Development Application subject to submission to an application under Section 60 by Council.

It is proposed that an application under Section 60 of the Heritage Act 1977 be prepared by Council based on retaining the rail line on the bridge but removal of sleepers which would address safety issues for the future.

It is considered that with strong support by Council and representations to the Minister if necessary, that this compromise involving removal of the old sleepers can be achieved with Heritage Council of NSW

Transport for NSW/John Holland-now replaced by UGL

Two outstanding matters relating to Transport for NSW are summarised below;

1. Licence for use of Bridge

Agreement in principle was received from Transport for NSW however one condition required Council to be responsible for maintenance of the whole bridge. In earlier discussions it was advised that Council would only be agreeable for maintenance of the new structure to be placed on the bridge and not existing components of the bridge.

It is considered that this item could be negotiated under the licence to limit maintenance responsibility to the new walkway structure to be placed on the bridge

2. Approval for works on Rail Bridge-Contractor for Transport NSW

In considering the approval for works on the bridge John Holland Rail expressed concern over safety issues with deteriorating sleepers on the bridge and as a condition they were intending to remove the rail and sleepers. This intention was included in an application under Section 60 to Heritage Council of NSW by John Holland Rail and approval was refused on the grounds that rail and sleepers should remain.

It is considered that the compromise involving removal of sleepers but retaining rail can be negotiated with assistance of relevant Minister and our local member

Access to the Bridge structure

It is likely that UGL will remove the viaduct due to its poor condition and public safety risks and this aspect has already been subject to a public consultation.

There is therefore scope for access to be bridge structure within the rail corridor with no conflict to adjoining land use.

Narrandera Landcare Inc has invested many years and funding to develop this Lattice Rail bridge concept with considerable support of Council staff. Narrandera Landcare urges Council to reflect community views and aspirations and reallocate funding from the proposed Skywalk project to this significant tourism and community benefit project.

Yours Faithfully,

Ken Murphy

General Manager
Narrandera Shire Council
East St
NARRANDERA 2700

Dear Sir

Re- Submission in regard to Skywalk Program

As a regular user of the Narrandera Fauna and Flora Reserve and Lake Talbot I was horrified at the proposed Skywalk over Lake Talbot. It is the natural surroundings of the area that is the attraction, and such an object would be detrimental to the area.

Many people come to Narrandera to appreciate the natural beauty of the area as well as the koalas. There are many things we could do to add to what is available and the skywalk is not one.

The proposed structure will not encourage people to turn off the highway to visit Narrandera especially in winter when the lake is drained, it is not a beautiful site.

If an attraction does not meet the travelling population's expectations they readily post their displeasure on social media and such posts could be damaging to Narrandera Tourism in general.

I believe that the Historical Bridge Proposal over the Murrumbidgee River should be reinstated as part of the "Playground on the Murrumbidgee" project.

This bridge needs to be maintained as part of Narrandera, not only for its history but also its beauty. Narrandera was given the money for the project, and this is what it should be used for.

I am scared by what might happen to the bridge if we don't move on the project now. At Wagga two panels of their original lattice iron bridge sit neglected on the side of the Murrumbidgee River in the area where it once had pride of place over the Murrumbidgee.

The saddest thing is that these two projects have divided Narrandera a town many people have worked hard to shine a light on. I am so disappointed because Narrandera needs leadership at this stage, and I cannot see any.

I appreciate the work of Council staff who, like the volunteers involved in the historic bridge project, have spent many hours trying to achieve a successful outcome. I do however believe the Narrandera community has a great deal they can offer to assist the Councillors to make the right decisions for Narrandera.

Yours faithfully

Gayle Murphy

Mayor and Councillors
Narrandera Shire Council
141 East Street
NARRANDERA NSW 2700

Dear Sir/Madam,

RE: PROPOSED SKYWALK

Thank you for the opportunity for us to provide a submission with regards to the proposed Skywalk Project at Lake Talbot, Narrandera.

We strongly object to this Eyesore spoiling the natural beauty of the Lake Talbot escarpment and will vigorously fight Council in any move to advance the project.

The actions of the previous Council in relation to the rejection of the Lattice Bridge Project at the 19th October 2021 Meeting (Item 15.1) for no significant reason and the quick swap to a Skywalk Project at the 23rd November 2021 Meeting (Item 17.1) does not meet acceptable community expectations. In fact, Community Members who understand the full facts of the matter think the actions of the previous Council are unethical and reinforce the low standing Narrandera Shire Council Leadership has in our Community. There are many unanswered questions.

In relation to the rejection of the Lattice Bridge Project, four reasons for the refusal were given at the October Council Meeting. These reasons have been repeated on Community Radio (21/3/2022) and in the Narrandera Argus (24/3/2022). We want to list each of these pitiful reasons and add commentary:-

1. Loss of Amenity for adjoining properties: We requested all submissions in relation to the Lattice Bridge Project. We expected several submissions but to our astonishment there were only 2 submissions. The 2 Submissions which we examined were not strong and we ask the following questions:
 - (A) Are these two landowners so influential that they can knock out this outstanding Project?
 - (B) Did the landowners not know when they purchased that they live next to an existing Rail Corridor and close to the junction of 2 National Highways?

27 Bolton Street Narrandera NSW 2700

Phone 02 6959 3380 : Fax 02 6959 1030

Email admin@hallsaccounting.net

Liability limited by a scheme approved under Professional Standards Legislation

- (C) How are these landowners going to cope if the Narrandera to Tocumwal Rail Project gets built?
 - (D) Would the completion of the proposed 24 Hour Service Station at Gillenbah cause greater loss of amenity?
 - (E) The Mayor has a best friend who is a landowner in the vicinity of the Lattice Bridge Project. Has the Mayor declared a Conflict Of Interest (Non-Pecuniary) in relation to his voting in the matter?
2. Potential Increase in Operational Costs: We ask the following questions:
- (A) Have these costs been Quantified?
 - (B) Has the Narrandera Shire Council Audit Risk and Improvement Committee been consulted on these Risks? The current Chairperson of that Committee is a very experienced Local Government Manager who has risk assessed and brought many projects to fruition.
 - (C) Have the Operational Costs of the Skywalk been quantified?
3. No tenure over the surrounding land and access to the bridge as it currently sits on Crown Land: We ask the following questions:
- (A) So what? There are many examples in rural and metropolitan NSW where Council Projects sit on Crown Land.
 - (B) Has Council had any meetings with NSW Crown Lands to overcome any obstacles which we would consider minor?
4. The attraction of visitors to that area may have impacted the Aboriginal Heritage. We ask the following questions:
- (A) What consultation has Council carried out with our Aboriginal Community? There seems to be support in our Aboriginal Community for the Lattice Bridge project.
 - (B) Is Council using our Aboriginal Community and Heritage to defend their appalling lack of judgement?

There are several other unanswered questions that we would also like to ask the Mayor:-

1. Why has Council waited 4 Months for Community Consultation to commence regards the Skywalk? It was voted on at the Council Meeting of 23rd November 2021 and only open for Submissions from mid March 2022?
2. Why did 5 Councillors vote against the Executive Notice OF Motion on 19th October 2021 supporting the Lattice Bridge Project when there were only minor obstacles?
3. Does Council think it ethical to swap the well researched Lattice Bridge Project for the quick Skywalk idea?

4. Why did Council push through the Skywalk project within a fortnight of the Local Government Election of 4th December 2021?
5. Council was advised of a Community Meeting on 23rd March 2022. The Meeting was well attended by the Community on 29th March 2022 at the Narrandera Ex-servicemen's Club. Why did the Council not advertise the meeting on Social Media as with all other happenings in the Shire?
6. What due Diligence, such as an EIS, has been completed in relation to the Skywalk Project to date?
7. How much Ratepayers Money in staff time has been spent on the rejected Lattice Bridge Project?
8. How much Ratepayers Money in staff time has been spent so far on the Skywalk Project?
9. Why does the Mayor allow the General Manager and the Deputy General Manager Infrastructure to monopolise and lead the Community Debate regards the rejection of the Lattice Bridge Project and the quick swap to a Lake Talbot Lookout?
10. Does Council believe it has acted ethically and in the community interest by ditching a 5 year volunteer project for the weakest of reasons?

It is now April 2022 and Narrandera Shire Council has a new set of Councillors. Please reject the Skywalk Project and reinstate the Lattice Bridge Project. The minor obstacles regarding the Lattice Bridge Project can be overcome with enthusiasm and focus. It will be the first step in restoring accountability and integrity at Narrandera Shire Council.

Yours Faithfully

Narrandera Mayor and Councillors
141 East Street
Narrandera NSW 2700

Dear Mayor Kschenka and Councillors Lyons, Clarke, Lewis, Payne, Morris, Ruffles, Lander, Dawson

Thank you for the opportunity to provide this submission.

I am asking Council to stop the Skywalk project immediately.

I am responding after hearing from both the Community and Council.

I believe the Skywalk is an ill-conceived project that has not been well researched, will not serve as a “real” tourist destination, does not fit with the beauty and amenity of Lake Talbot, is uninspired in design and will be a permanent, ugly scar on the lake.

It will be an unloved permanent reminder of how our Council can get a project so wrong and waste money. If built, it will have been completed without proper Community consultation, support or due diligence. The Skywalk project demonstrates how out of touch Council is with the Community it represents.

The Skywalk project appears to be just a “quick” fallback project with Council’s motivation to just spend the Rail Bridge grant on the basis the council was unable to deliver the Rail Bridge project. The true reasons behind Councils failure to deliver the Rail Bridge project after years of work and at considerable cost, then rejecting their own approved DA has still not been fully explained.

Council have not confirmed, to date, they have undertaken “full” due diligence on the Skywalk project. As an example, has an environmental impact statement been done and if so, has it been made public. There appears to be no visitation data on who will visit the Skywalk. Council representatives at the Town Meeting agreed with a question from the floor, it would be minimal, confined to caravan park users and pool visitors and few others.

Council has not consulted with the community and has, to date, not been unable to provide what level of community support there is for the Skywalk.

I am also asking Council to turn their attention back to the Rail Bridge project and for Council to seek approval to return the funding back to the original and rightful Rail Bridge Project. Council has been very clear and strong stating at the Town Meeting the Rail Bridge project has not been abandoned, therefore it should now recommence from where Council left off.

Council representing the Community should have a "can do" attitude instead of a "it's all too hard" attitude. Whilst there are a number of issues to be addressed with regard to the Rail Bridge project, each item should be worked through until resolved.

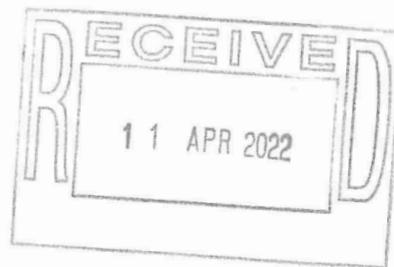

There is strong Community feeling that if Council fail to deliver the Rail Bridge project the grant money should be handed back for a truly worthwhile cause – not just wasted by Council on an ill-conceived project.

This whole episode (Rail Bridge / Skywalk) raises questions with regard to Council's ability to deliver worthwhile projects for the benefit of Narrandera and surrounds. I believe confidence in our Council is very low. Council has the opportunity to restore some confidence by involving and truly representing the Community by reversing recent poor decisions.

I would welcome Mayor Kschenka to formally provide me with comprehensive response to each point I have made.

Regards
Murray Hall

The Mayor,
Narrandera Shire Council,
NARRANDERA. 2700.

Dear Sir,

With regards to building the walkway over the Lake I am most definitely against it. It is just a huge waste of money with no benefit to the Town or Lake, I am sure if Council were asked to build such a thing and pay for it themselves, the answer would have been a definite NO.

My suggestion is rather than waste this amount of money it be returned for something better somewhere else.

Yours faithfully,

(Mrs) K. F. HINCHLEY.

Narrandera Shire Council
East Street
NARRANDERA 2700

Dear Sir

Objection to Skywalk Proposal

We, the undersigned, object most strongly to the proposal for a skywalk to extend over and above Lake Talbot. We consider the design to be ugly and intrusive into the natural, appealing environs of the lake and its surrounds.

In our opinion, the proposed skywalk would be an artificial monstrosity with limited capacity to showcase the natural beauty of the pocket of Nature that Narrandera is fortunate to have had bestowed upon it.

In line with the Hike & Bike network, we suggest the allocated funds would be better re-directed to the continuation of the Bundidgerry Walk as follows:

- Construction of a walk/ride track from the Rocky Water Holes bridge
- ;Commencing from the northern side of the bridge and continuing up the hill;
- Following a westerly direction along the ridge of the lake and coming out at the existing lookout;
- Again continuing onto Ngurang Road
- Linking up via Elizabeth Street with the existing Bike & Hike track;
- And returning to the carpark at the regulator via the canal bridge, thus forming a loop.

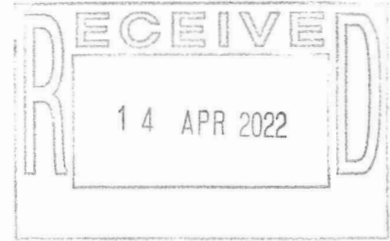

This track would surely be used more and provide more benefit to locals and visitors alike than the proposed skywalk, and without spoiling the vista of the lake and its surrounds.

Yours faithfully

R. Alchin

G Alchin
..... Glynis Alchin

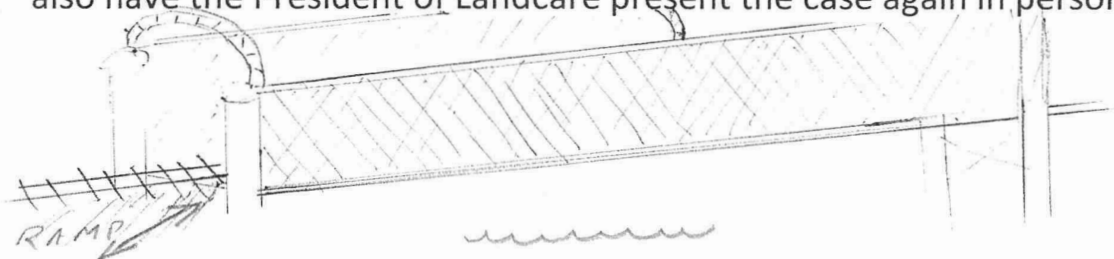

Lattice Rail Bridge

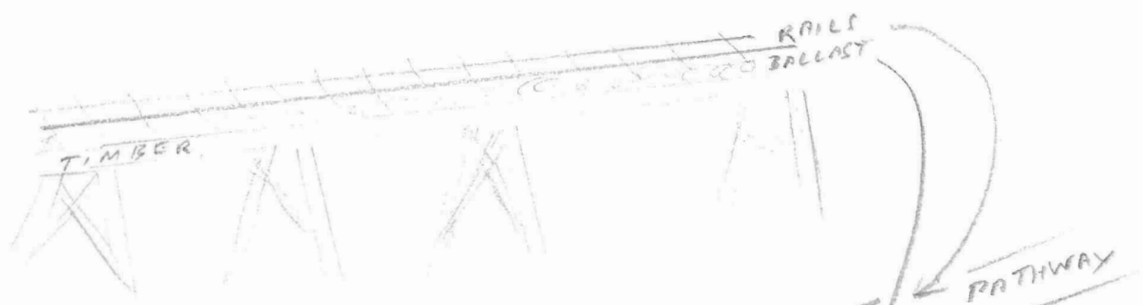

General Manager
 Narrandera Shire Council
 Dear Mr Cowan

Herewith are 5 proposals which I submit, following the imbroglio caused by the previous Council not proceeding with the Lattice Rail Bridge project and instead without research indicating an alternative Air/Sky walkway bridge. This alternative for several many reasons was rejected by the significant majority of people at the recent Public meeting.

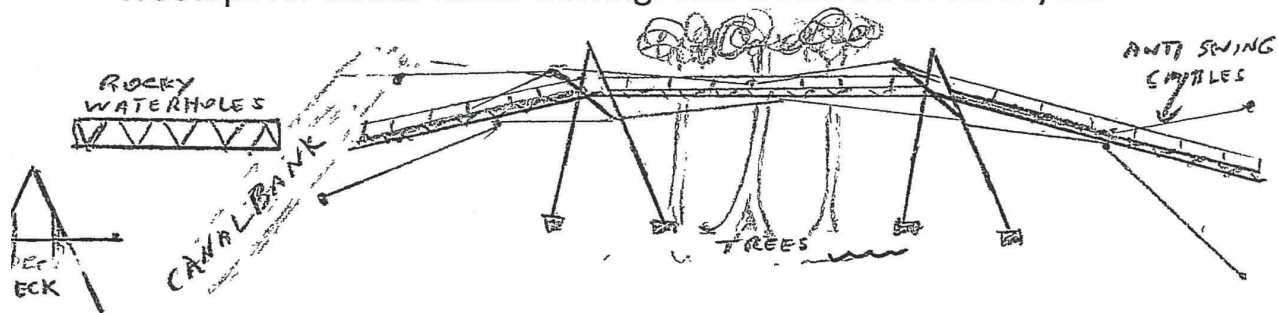

Proposal 1 - That the new Council reconsider the original proposal now that the Heritage council has given its OK along with mitigation solutions arising from the 2 complaints. The RMS in Sydney have found solutions to road users seeing inside peoples houses. The Lattice Bridge has to be made safe and cannot be left forever. Please also have the President of Landcare present the case again in person.

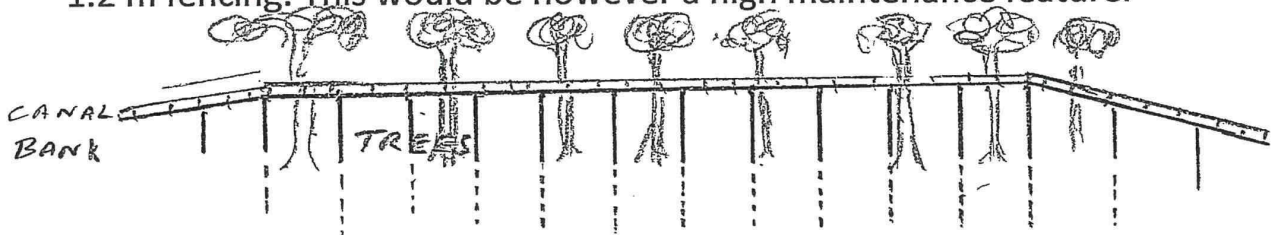

Proposal 2 - Use the grant instead to demolish the Railway Timber viaduct as it is a risk & very dangerous. Cut the rails, pull off to form a walk/bike track, then scrape the 40 tonnes of Ballast off each span onto the formed track and use and grade as a pathway base, remove timbers with the good being separated to use as a ramp or elsewhere. After sealing the pathway this will then provide good access to Koori beach on the Murrumbidgee.

Proposal 3 ; - Erect a proper Air/Sky Bridge at the southern side at the Rocky Waterholes Bridge off the canal bank with a 1 Metre wide ramp with 1.2 M high fence rising to 12 metres height, a flat bridge on steel A stilts with anti-swing cables, then a ramp down to the Forest floor. Thus providing a Bridge over the billabong in wet times to the interior of the Reserve, with the opportunity to be near Treetops for better Koala viewing. This would be a real Skywalk.

Proposal 4 – Erect a high Bridge at the southern side at the Regulator Reserve entrance gate 7 metres high to cross the low flood area. The distance is approximately 200 metres. It would be easier to hammer rust treated steel into the ground & run a single RSJ steel beam between supports & trees using knurled plate steel for the path with 1.2 m fencing. This would be however a high maintenance feature.

Proposal 4 - Return the balance of the \$820,000 funds to Consolidated revenue requesting it be redirected to Flood housing relief in Northern NSW.

Please note ; It has been suggested that the young people like the idea of a Sky walk. Of course they would, without the full knowledge! When explained to them they are almost all keen to have the Rail bridge safety upgraded to view the River and its currents.

Furthermore, we built the Rocky Waterholes bridge together, time is limited I know, but we can work together to achieve the Lattice Rail Bridge Walkway, to have mid River views of the Murrumbidgee.

Submitted in Good Faith

Sincerely 

R. (Bob) Manning

Resident, Ratepayer & Volunteer, heavily involved in the Rocky Waterholes Bridge successful reconstruction.

47 BOUNDARY ROAD
NARRANDERA

Mr. George Cowan,

Recently I attended a meeting regarding the proposed skywalk at Lake Talbot; I commend the organisers of this meeting. I must say that the proposed skywalk is a very unattractive structure, which resembles a crane and would not look out of place on a construction site.

I was very disappointed to hear Neville say that he thought it was an attractive structure which fits into the natural beauty, and in his opinion it would attract tourism to our town and also the Lake Talbot swimming complex was not a major tourist attraction. I disagree with this statement. I spoke with a family at the pool last Wednesday who had travelled from Penrith 3 times in the past week just to come to our pool, returning to Penrith at the end of each day.

I have also spoken with families from Junee and Wagga who come to Narrandera solely to go to the pool.

Narrandera pool is unique in the natural setting that it is located, so many people from other towns remark on this, and to desecrate this beautiful location is outrageous.

Mr. Wilson stated that this area where the proposed skywalk is to be situated is quite ugly, due to the construction of the slides and also the upgrade work done at the Caravan Park. That was all done by council, I suggest it would be more beneficial for this grant to be used as a project for council to beautify this area and to camouflage this area by planting native trees.

Also to improve the walking track, which has beautiful scenery, up to the Rocky Waterhole Bridge, and also the walking track on the channel bank. Native animal life is more visible on these tracks than would ever be seen from this eyesore skywalk as was stated at the meeting. I have seen on these walks, koalas, wallabies, echidnas, ducks, many lovely parrots, kookaburras and I am sure there is other wildlife there. I feel sure that tourists and local residents, would appreciate this more than the proposed skywalk.

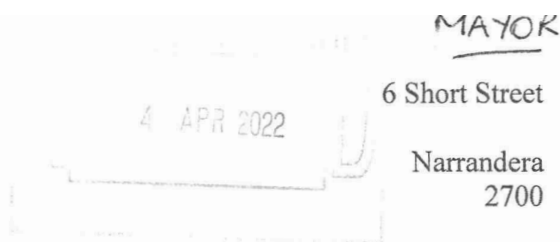

If this grant can't be used for something like my suggestion I agree it should be returned, it was granted for the Lattice Railway Bridge Walkway NOT this ugly skywalk.

It was also stated that maintenance for the Railway Bridge would have to be met 100% by Council, won't the council have to meet maintenance costs to the skywalk? Is this skywalk going to be manned at all times for the safety of users?

I, as a ratepayer and lifelong resident of Narrandera most definitely reject this construction of a Skywalk in this location.

Sincerely

Colleen Abbott

Mayor Neville and fellow Councillors,

Jenny Clarke and fellow Councillors,

Recently I attended a meeting regarding the proposed skywalk at Lake Talbot; I commend the organisers of this meeting. I must say that the proposed skywalk is a very unattractive structure, which resembles a crane and would not look out of place on a construction site.

I was very disappointed to hear Neville say that he thought it was an attractive structure which fits into the natural beauty, and in his opinion it would attract tourism to our town and also the Lake Talbot swimming complex was not a major tourist attraction. I disagree with this statement. I spoke with a family at the pool last Wednesday who had travelled from Penrith 3 times in the past week just to come to our pool, returning to Penrith at the end of each day.

I have also spoken with families from Junee and Wagga who come to Narrandera solely to go to the pool.

Narrandera pool is unique in the natural setting that it is located, so many people from other towns remark on this, and to desecrate this beautiful location is outrageous.

Mr. Wilson stated that this area where the proposed skywalk is to be situated is quite ugly, due to the construction of the slides and also the upgrade work done at the Caravan Park. That was all done by council, I suggest it would be more beneficial for this grant to be used as a project for council to beautify this area and to camouflage this area by planting native trees.

Also to improve the walking track, which has beautiful scenery, up to the Rocky Waterhole Bridge, and also the walking track on the channel bank. Native animal life is more visible on these tracks than would ever be seen from this eyesore skywalk as was stated at the meeting. I have seen on these walks, koalas, wallabies, echidnas, ducks, many lovely parrots, kookaburras and I am sure there is other wildlife there. I feel sure that tourists and local residents, would appreciate this more than the proposed skywalk.

If this grant can't be used for something like my suggestion I agree it should be returned, it was granted for the Lattice Railway Bridge Walkway NOT this ugly skywalk.

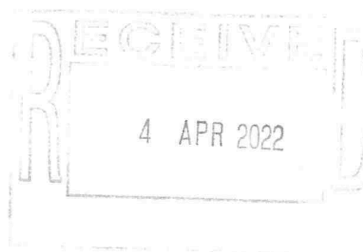

It was also stated that maintenance for the Railway Bridge would have to be met 100% by Council, won't the council have to meet maintenance costs to the skywalk? Is this skywalk going to be manned at all times for the safety of users?

I, as a ratepayer and lifelong resident of Narrandera most definitely reject this construction of a Skywalk in this location.

Sincerely

Colleen Abbott

Subject: skywalk

why has council decided to go ahead with this ugly eyesore which resembles a construction crane. As a regular lake talbot swimming complex user, I consider this to be detrimental to the natural beauty that we enjoy whilst exercising. Will this structure be manned at all times to prevent foolish and sometimes dangerous behaviour by members of the public. Surely insurance would be astronomical for this structure. Please for the natural beauty that we have , do not accept this grant. For the sake of Narrandera take heed of what the Narrandera ratepayers want and listen to us . Thank you. Sincerely C. Abbott

Feedback Sky Walk

Message

Why would a Council want to destroy Narrandera's greatest natural asset with such an ugly abomination? The sky bridge appears to be a random thought bubble to spend taxpayer grant money because the council put in the too hard basket the heritage bridge project, to protect the interests of a few influential landholders in the area. A copy of the environmental impact assessment and cost benefit analysis needs to be made available to the community. The outcome of community consultation needs to be made available to determine if anyone in the community supports it. Who will run the sky walk? What will be the cost to walk on the bridge? How many walkers per year to get to a break even point? Who will pick up the cost if it turns out to be a giant white elephant? I visit Narrandera frequently as a tourist. I love walking up the back of the lake enjoying its natural serenity. What was the brief for the sky walk... come up with an incredibly ugly bridge which will destroy the environmental integrity if Lake Talbot so no one will want to visit it. This project must not proceed. Give the grant money back rather than destroying Narrandera's greatest natural asset and stop future ratepayers being saddled with cost to maintain or demolish. \$700000 will be chicken feed compared to the future cost burden on ratepayers.

FW: Sky Walk

Dear George

Follow up
Flagged

I do NOT support the sky walk for the following reasons:

The design of the sky walk is an ugly monstrosity which will detract from the natural beauty of Lake Talbot. In fact there is no "design element" in the proposed structure. It appears to be an engineer's solution to a Council maybe saying to them "what could we build for \$800 000". Lake Talbot is Narrandera's number 1 tourist attraction which is valued for its natural beauty. Why build something which will detract from its natural beauty?

The sky walk will not offer any improved view of Lake Talbot.

The sky walk is a waste of tax payer money and is unlikely to attract more tourists to the town. The Lattice Bridge project, in contrast, would have been a good use of tax payer money, and would have had the potential to attract tourists for longer stays in Narrandera. I would like the grant money returned to the state government rather than being wasted on an ill-conceived project.

The Council has failed to consider maintenance and up keep costs on the sky walk which will fall on future ratepayers.

The Mayor says young people support the sky walk's construction. If this is true, I wonder if it is because they see it as a great jumping platform into the lake. If so I hope the Council has plenty of public liability insurance.

Sky walk

Message

This is probably the worst public project the council has ever proposed. It is a known fact that this sort of project only interests the public for about five years then they become an eyesore because of a lack of patronage . Then the high cost of removing it will be a burden on ratepayers

Skywalk

Message

I am not in favour of the skywalk I feel it would be an eyesore and yet another thing to destroy the environment. Another area that disabled people cannot use. We already cannot access the path along the canal like others can. I remember when we tried years ago to get the pool heated but no one wanted to destroy the environment the natural habitat called 'snake island' but without the people's consultative process a grant was received and snake island was no more. No well have a process in the lake where there is a build up of stagnant water in one corner. Please consider the whole town not a small minority when making decisions that affect us all.

Kind regards m

This is an absolutely ridiculous idea. Plenty of other things needed in town. What good is it. Someone going to get hooked up in it. Fall off it Sue the council. How much is the public liability cost for this structure. Can the disabled use it. Can't see my scooter being able to be used. How does it get to a tender point without the whole town being asked in a survey. What about the zone 5 ski championships do we still hold them what a put off this eyesore would be to people trying to ski.

Lake Talbot Skywalk

Message

While I understand the funding and budget constraints Council work under, increasingly Council's primary function seems to be that of a grant application factory. Whatever the money gets spent on seems to be a secondary concern. As long as the money's spent in the town, it can only be good, right? No. Not true. It's only money well-spent if it scratches a real itch and doesn't set us back in any way. Worse than wasting money on something that's not needed, I believe this Skywalk proposal compromises an extremely valuable and irreplaceable town asset - our remarkable natural lake area. I'd urge Council to abandon this project. We'd be much better off without it.

Skywalk

Message

Dear Councillors , I am against the proposed Skywalk installation as I feel it will take away the natural appeal of our already beautiful views of Lake Talbot 🙏 also as a rate payer my concern is the costs of maintaining such a huge project which will certainly hit the rate payers in the pockets of our community. I feel the money spent would be best to go towards numerous other community & health services that our town so desperately needs.

Thankyou 🙏

Yours Sincerely, Helen Chitts /Howitt .

610526 - Skywalk Submissions - Other Received.

Rita Hill
24 Apr 22.The Mayor,
Norraundara Shire Council,

Dear Sir,

I believe I am, and have been, a strong supporter of Council and Council Staff. I am impressed by the work of senior staff.

The achievements of Council, particularly in relation to the Swimming Complex, the Sports Ground, the Henry Matheson Oval, the Cemetery and the Library deserve special mention as they demonstrate an active community oriented administration and merits the appreciation of the rate payers and townsfolk alike.

However, I have to say, reluctantly, that I do not support the construction of the Skywalk.

As a general rule, I believe strongly, that Council should only undertake new community works, of this nature, as a result of wide consultation with the community. On this occasion I do not believe ^{any} individual or group sought to have a Skywalk built at Lake Talbot - hence the controversy.

Furthermore, I fully understand why "young people were enthusiastic about the project" (Mayor's report August 2011) as they saw it as an exciting development. On the other hand older members who appreciate the natural beauty of Lake Talbot are strongly opposed - as I am. Putting it bluntly we see it as an uncalled for addition to the Lake, in fact, a horrible unnecessary eyesore.

I question the validity of the views and expressions of interest given by Mr Rex Evans at the Council meeting on 19 Apr.

I sincerely believe that the Lake Talbot Environment Committee has been solely responsible for the destruction of the Environment of Lake Talbot!

Before the Committee existed and ^{BEFORE} the arrival of the speed boat (Water Ski)shaker Talbot had clean flowing water, a large and impressive range of bird life, fish and an edging of beautiful willow trees. — All gone ^{BEFORE} rowing boats were popular ^{THEN} and, believe it or not, Hansandersa boasted a rowing eight. (I think my son was a member of the last crew to man the boat.)

It would seem quite reasonable, practical, worthwhile, and to the advantage of all parties, to take the following action:

Ban all powered boats (motor). The users of such craft have an alternative location at the "Five Mile":

Invite and promote the use of skiffs (small sailing boats), rowing boats, paddle boats, canoes, etc., to have sole use of the lake.

As a suggestion I believe a Skywalk through ~~the~~ the Koala Sanctuary would be well worthwhile. Visitors would then be able to observe these wonderful creatures more closely and the town would have a Skywalk at about the same cost as the one suggested.

25 Apr 22.

Subject: Safety

If this project goes ahead will this be manned? And closed off to the public when not, it's a perfect 'jumping' opportunity or a huge fall risk for young children? I think it's a great project but so much liability attached to it. I think you need to look at falls from that height and what the outcome would be especially landing in shallow water. I think you need to consider suicide rates, DV and the number of young people roaming the streets.

Subject: Lake Talbot skywalk

My concern is that there is was no input from local people and as I read from many comments it's not an ideal project to be establish for a tourism profit when other projects are needed within our community. Also were there any consultation with the Aboriginal community about the said land that the skywalk was to be build on such as cultural n heritage (sacred sites, flor n fauna and our local animals. This project could have a enormous effect on our environment!!!!

Skywalk

Message

We are curious what benefits this has to the townspeople and their business. At the very least Teleo must make a decent 3d render so people understand exactly what is being built. The current image you are showing the community is very poor and VERY basic. It does not represent location, skyline, or actual view. Your chosen engineering design company needs to do a better render, seriously even photoshop the 'skywalk' on to a photo taken in situ.

What is the council's aim of building the skywalk? What purpose does it serve for the Narrandera community and business owners. How will rubbish being thrown and blown into the lake be managed?

610524 - Skywalk - Petition

12th April 2022
 27 Bolton St
 Narrandera NSW 2700

Mayor and Councillors
 Narrandera Shire Council
 141 East St
 NARRANDERA NSW 2700

Dear Sir/Madam

Re: Skywalk Submission

Thank you for the opportunity to provide a community submission regards the proposed Skywalk.

Over the past 20 days a petition has been circulating amongst Narrandera Business Houses. The petition states a simple fact:

“We the undersigned, **DO NOT SUPPORT** the construction of a **Skywalk** at Lake Talbot. The natural beauty of Lake Talbot will be ruined. It is the natural beauty which attracts residents and tourists to the area”.

141 residents and tourists have signed the petition which we regard as a very good response rate for our Shire.

A Facebook page “Save Lake Talbot – Stop the Skywalk” was established on 23/3/2022. Over the next 20 days to 12/4/2022 these are the statistics:

23/3/22	Local Council	486 people reached
23/3/22	Meeting Invitation	1977 people reached
25/3/22	How good is this bridge	223 people reached
26/3/22	What an Eyesore	713 people reached
28/3/22	ABC Riverina	328 people reached
29/3/22	ABC Riverina	273 people reached
30/3/22	Great Community Meeting	413 people reached
31/3/22	Congratulations Narrandera	347 people reached
11/4/22	Attention NSC	158 people reached

A Community Meeting was successfully held in Narrandera at Narrandera Ex-Servicemen's Club on 29th March 2022 with 89 interested parties in attendance (1 left early in disgust).

The Narrandera Community wants you to stop the Skywalk Project immediately.

Yours faithfully

Wesley Hall

Community Representative
